

## Make Every Day Earth Day by taking action with EcoAction Teams

We all could use a little help these days making better environmental and economical decisions.

Your group, in conjunction with **Earth Day Canada's EcoAction Teams** program, can provide members with a plan to reduce household resource consumption, greenhouse gas emissions and spending.

Sign up, start a team, then take part as a group and discover the value of better environmental choices!

### 1. Join the Movement

Get on the *EcoAction Teams* website at [www.ecoactionteams.ca](http://www.ecoactionteams.ca) and join thousands of Canadians who are committing to environmental lifestyle changes.

### 2. Register Online

Sign up at <http://calculator.ecoactionteams.ca> and browse through 50 measurable environmental activities (and hundreds of additional tips). You can measure your energy, water, waste and fuel reductions and automatically generate a personalized savings report to see the immediate benefits of your action!

### 3. Start a Team

Once you have your own member account, you can create a team on the *EcoAction Calculator*. Create and name the team, then invite your coworkers or community members to join it. You will soon see the benefits of group action in real figures.

*Note: The calculator tool is customizable. One large organization can create several smaller teams to issue a cross-company challenge. You can also belong to more than one team. **Join today!***
